Technical Product Manager focused on AI-enabled workflows, automation, and product delivery across agency, startup, and client-facing environments. Experienced turning ambiguous business needs into clear requirements, PRDs, roadmaps, prototypes, and delivery plans. Strong technical fluency across APIs, SQL, automation tools, and AI-assisted product workflows, with experience leading cross-functional teams across engineering, design, QA, clients, and leadership.

Professional Experience

Revolt Digital Dec. 2024 - Present

Product Manager / Technical Project Manager

- Lead client facing digital product, data, automation, and AI oriented initiatives across external products, dashboards, prototypes, internal tools, and product operations systems.
- Manage cross functional squads of 2–10 people across engineering, design, QA, leadership, clients, and third party stakeholders, coordinating up to 3–4 parallel initiatives depending on project complexity.
- Translate ambiguous client and business needs into structured PRDs, roadmaps, user stories, epics, acceptance criteria, delivery workflows, documentation, and actionable technical requirements.
- Drive product and delivery work across big data modernization, AI oriented dashboards, search experiences, product prototypes, enterprise AI proposals, and internal operations tools.
- Coordinated product delivery for a big data modernization initiative involving migration from legacy Java systems to Python, helping create a more flexible foundation for modern data workflows and LLM ready capabilities.
- Built AI enabled product prototypes using Claude, v0, Cursor, Next.js, Vercel, Node.js, Render, and Supabase, reducing early prototype turnaround from weeks to hours in selected cases.
- Built and automated internal product operations workflows, including Jira time tracking, resource allocation reporting, holiday calendar tooling, Notion documentation systems, and project visibility workflows.

Aerolab Digital Apr. 2022 - Dec. 2024

Digital Project Manager

- Managed 3–5 concurrent digital product projects across mobile apps, web platforms, design systems, and development initiatives for clients in wellness, crypto, wallets, real estate, financial services, and banking.
- Led cross-functional teams of 2–6 people across design, development, QA, and client stakeholders, ensuring clear scope, delivery planning, risk management, and production readiness.
- Acted as the main client-facing point of contact, managing expectations, surfacing risks, clarifying requirements, and aligning business goals with delivery constraints.
- Helped recover high-risk projects by reorganizing scope, clarifying blockers, managing technical constraints, improving communication, and restoring alignment between clients and delivery teams.
- Managed complex banking and wellness projects affected by security, integration, dependency, and technical constraints, helping teams reach production and extend client relationships.
- Improved delivery workflows, project tracking systems, documentation practices, rituals, and release planning across multiple client accounts.

TA Telecomunicaciones Jan. 2018 - Apr. 2022

Project Management Assistant

- Supported project management operations across telecommunications, hardware, firmware, software, IT, IoT, DevOps, and modular data system initiatives.
- Assisted with planning, documentation, status tracking, client communication, delivery control, Agile ceremonies, and technical project coordination.

Tools & Technologies

AI & Automation

ChatGPT · Claude · Claude Code · Gemini · v0 · Cursor · Notion AI · RoVo · n8n · AI Documentation · Workflow Automation · AI assisted QA

Product & Delivery

Jira · Confluence · Notion · Asana · ClickUp · Linear · Trello · Slack · Google Workspace · Figma · Miro · Scrum · Kanban · MoSCoW · Jobs to be Done

Technical

REST API · GraphQL · SQL · Postman · Supabase · Git · GitHub · Python · JavaScript · TypeScript · Node.js · Next.js · Vercel · Render

Analytics & Reporting

Looker Studio · Power BI · Resource Allocation Reporting · Time Tracking · Operational Dashboards

Education

Degree in Business Administration (Expected 2027)

Universidad Blas Pascal
